- Indiranagar, Bangalore
Karnataka, India

EDUCATION

B.Tech in Computer Science
Jaypee Institute Of Information
Technology, Noida - 2017

SKILLS

Languages :

- Javascript
- Typescript
- GraphQL
- Python
- SQL
- CSS
- HTML

Library & Frameworks :

- Node Js - ES6
- React Js
- Express Js
- Nest Js
- Redux
- FastAPI
- MaterialUI

Tools & Databases :

- MySQL
- MongoDB
- PostgreSql
- Redis
- KAFKA
- Docker
- AWS
- CI
- SonarQube

PROFILE

- Around 7 years of experience in **software development**, specializing in **back-end** and **full stack development** across various industries.
- Critical-thinker** with expertise in future **product planning**, developing each element of the server side and writing clean & scalable codes.
- Familiar with **working with development teams and product managers** to ideate software solutions and **system design** for server-side architecture.
- Proficient in leveraging a diverse technical skills encompassing **JavaScript, Node.js, React.js, Python** and **micro-services** technologies to develop innovative solutions and drive project success through efficient **coding practices** and strategic **problem-solving** approaches.

WORK EXPERIENCE

ACL Digital, Bangalore

05/2024 - 05/26

Sr. Software Engineer

- Designed and built a microservices-based system using Node.js (TypeScript) with Redis (cache & queue) and PostgreSQL, improving performance upto 70%.
- Developed and managed three microservices (two APIs, one WebSocket).
- Led direct client interactions, gathering requirements, refining features, and translating business needs into technical solutions.
- Enhanced real-time communication via WebSockets, ensuring instant updates and a seamless user experience.
- Optimized API response times and reduced database load through efficient caching strategies and optimized queries.

91 Social, Bangalore Client (Resolve AI)

12/2023 - 4/2024

Sr. Software Engineer

- Involved in version upgrade of a smart online ticketing system using Typescript within a monorepo architecture.
- Led the implementation of complex scalable features.
- Integrated AI functionalities for advanced ticket management in collaboration with crossfunctional teams.
- Launched new features enhancing system performance.
- Optimized back-end performance through database tuning, caching strategies, and asynchronous processing.

LanceSoft, Bangalore Client (Lentra AI) - Contract

4/2023 - 11/2023

MERN Stack Developer

- Architected a SaaS banking service management platform using viteJs and nodeJs.
- Enhanced application responsiveness by professionally managing application state using Redux Toolkit and Thunk middleware.
- Collaborated with developers to define and implement innovative solutions.
- Designed and implemented RESTful APIs for seamless integration between front-end and backend systems.

FlipTree

02/2022 - 06/2022

Java Developer

- Sole Backend Engineer in a 4-member product team, responsible for architecting, developing, and maintaining backend systems for a matrimonial platform.
- Quickly mastered a large multi-service legacy codebase and delivered new features with minimal onboarding support.
- Researched and integrated third-party services such as Surepass for identity verification and onboarding workflows.

PrepLeaf, Delhi

09/2018 - 12/2021

Software Developer

- Created visually appealing components and essential APIs using Node.js.
- Collaborated on the UI design of the Prep-seed App using the MERN Stack.
- Contributed to the seamless user experience through efficient app development

CORE COMPETENCIES

- Agile & Scrum Methodologies
- Full-Stack Development
- Frontend & Backend Development
- Web Application Development
- Software Development Lifecycle (SDLC)
- Unit & Integration Testing
- Technical Documentation

CERTIFICATIONS

- Modern React with Redux.
- The MERN Full Stack Guide, React Node Mongo & Express Course.
- Coding BootCamp - AttainU MERN Stack Development

PROJECTS UNDERTAKEN

(QualApps) Peeps App :

Designed and developed a real-time disaster response system using Node.js (TypeScript), Redis, WebSockets, and PostgreSQL in a microservices architecture with three services (two API and one socket service), ensuring instant updates via caching and queuing. Singlehandedly built and deployed the entire backend, handled frontend enhancements in React, created Swagger docs & README, and collaborated with DevOps for cloud deployment, improving system efficiency by 95% over the legacy version.

(RezolveAI) Lakers Bay :

Helped in version upgrade for Lakers Bay, an online ticketing system, built with TypeScript in a monorepo architecture. Spearheaded feature implementation that ensures robustness and scalability. Employed Redis cache and Kafka for efficient data handling and real-time messaging.

(LentraAI) Cadenz Profile :

Architected Cadenz Profile, a SaaS banking service management platform powered by Node.js, Express.js, MongoDB, and Redis. Integrated Kafka for real-time data processing and messaging across microservices. Implemented Storybook for comprehensive documentation, enhancing codebase understanding. Established a microservices architecture for scalability and modularity. Participated in the optimization of backend performance and reliability, ensuring scalability as the user base expands.

(FlipTree) FlipTree :

Contributed to a project developed with Java Spring Boot, resembling UrbanClap's model, focusing on service aggregation and booking. Leveraged Stripe for seamless payment processing and Redis for efficient caching of frequently accessed data. Implemented advanced features for service booking and management, ensuring a smooth user experience. Collaborated with cross-functional teams to integrate third-party APIs and services.

Lumi-Matrimony:

Contributed to Lumi Matrimony, a matrimonial website developed using Node.js. Employed Redis cache for optimizing website performance. Addressed issues to ensure seamless matchmaking experiences.

(PrepLeaf) PrepLeaf :

PrepLeaf, developed with Node.js and React, trains students in data science and other courses, connecting them with job opportunities. It offers interactive courses, practical exercises, and real-world projects for a comprehensive learning experience.

Prepseed:

Instrumental in developing Prepseed, an exam preparation platform using Node.js, Express.js and MongoDB. Implemented real-time analytics and feedback mechanisms.
